

### Reason

In order to pass the TK0-202 and obtain the CompTIA CTT+ Classroom Trainer certification, **a candidate must submit a 20-minute classroom training video** with the following specifications:

- Video recording length within 17 – 22 minutes long
- Instructional content should be professional in-nature
- Video demonstrates the candidate accomplishing the 12 Examination Objectives (See page 2)
- Minimum of five (5) participants are seen in the video
- Site should be appropriate for training and class interactions
- No editing (cutting and splicing) of video recording is allowed.

To ensure a smooth and efficient recording experience, students who take the CTT+ Classroom Trainer Fast Track program are advised **to choose an instructional topic even before attending Day 1** of the class.

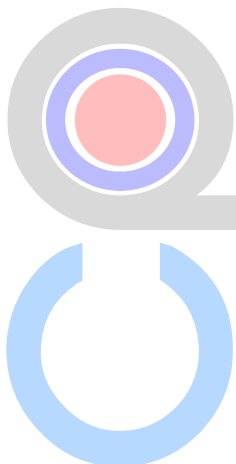

### Suggested Topics

Candidates are encouraged to choose a topic of which they are the subject matter experts (SMEs). In this way, preparing the instructional content would be easier, more comfortable and stress-free.

Due to the 20-minute recording time limitation, the topic of choice must have learning objectives that can be taught and delivered within that amount of time. Examples of topics include (but not limited to):

- Electronegativity and Bonding Types (Chemistry)
- Newton's Laws of Motion (Physics)
- Parts and Functions of a Cell (Biology)
- Introduction to EKG Concepts (Allied Health)
- Overview of the Branches of Law (Law)
- Working with Formulas in Excel (Software)
- Actions of Adrenergic Agonists (Pharmacology)
- Database Normalization Rules (Database Management)
- Comparison of Three Main Educational Philosophical Paradigms (Education)
- Usability of Sentence Diagramming (English Grammar)
- Introduction to the Concept of Gamification (Software)
- Law of Supply and Demand (Economics)

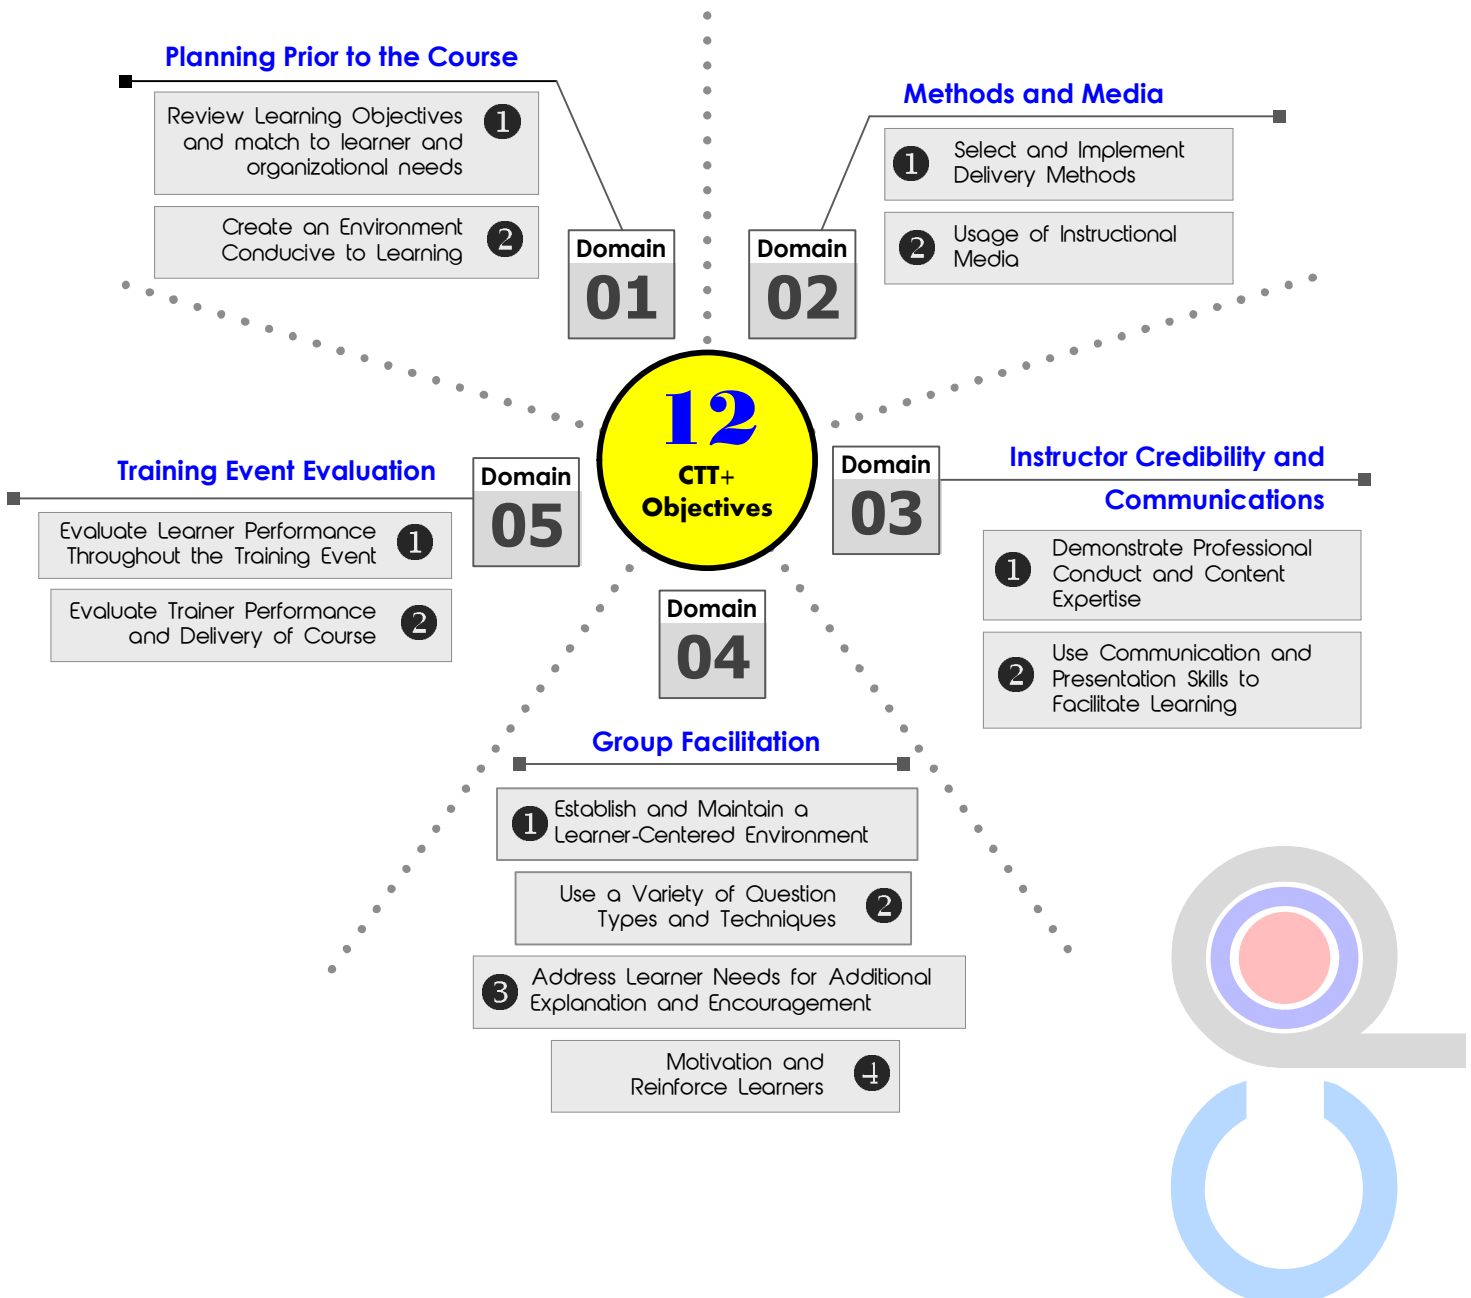

**... and a whole lot more!**

### Exam Objectives

The CompTIA CTT+ TK0-202 examination consists of twelve (12) objectives, which are grouped into five (5) Domain categories. A candidate's video submission is scored based on these 12 objectives:

- ❑ Each objective has a maximum score of 4
- ❑ No objective must have a score lower than 2
- ❑ Total score must be at least 36 to pass
